SUMMARY

Full-Stack Developer with 3+ years of professional experience (since 2023), backed by internship experience since 2019, delivering ASP.NET Core, PHP (Laravel, Symfony), React.js/Next.js, and Python automation solutions for clients in the USA, UK, and Europe. Proven fully remote contributor with self-managed delivery, clear async written communication, and reliable overlap with North American and European working hours. Experienced working inside distributed teams of 10+ developers, designers, and QA specialists using Git, Jira, Slack, and Azure DevOps to ship production-grade web applications, CRM/ERP systems, and SaaS platforms on time.

CAREER HIGHLIGHTS

- 3+ years of professional full-stack development (2023 to present), plus internship experience since 2019, with 100+ projects delivered
- Proven remote delivery: self-directed, async-first collaboration with clients and teams in the USA, UK and Europe using Git, Jira, Slack, Zoom, and Azure DevOps
- Expertise in ASP.NET Core, C#, PHP (Laravel/Symfony), React.js and Next.js for distributed, cloud-hosted teams
- Python automation and web scraping at scale (Scrapy, Selenium), delivering structured data through REST APIs
- Cloud deployment and performance optimization on Microsoft Azure and AWS

WORK EXPERIENCE

Full-Stack Developer (Remote) — Nov 2023 - Present

Progression: PHP Full-Stack Web Developer > Full-Stack Software Developer (ASP.NET) > Freelance Full-Stack Developer

- Built dynamic web applications with PHP, Laravel, and Symfony, then moved into enterprise application development with ASP.NET Core, C#, and SQL Server
- Deliver fully remote, end-to-end projects covering requirements, architecture, development, QA, and deployment using React.js, Next.js, Vue.js, PHP (Laravel, Symfony), and ASP.NET Core for international clients
- Built and maintained RESTful APIs across every stack for reliable frontend-backend integration and third-party connectivity
- Designed database schemas and optimized SQL queries, improving application performance and reliability
- Coordinate asynchronously with distributed clients across time zones via Slack, email, and scheduled video calls
- Lead a distributed team of 10+ developers, designers, and QA specialists to ship large-scale projects on schedule

Key Technologies: React.js, Next.js, Vue.js, PHP (Laravel, Symfony), ASP.NET Core, C#, Node.js, MySQL, MongoDB, SQL Server, Azure, REST APIs

PHP Developer Intern — Jun 2023 - Nov 2023

- Worked on dynamic web applications using PHP, Laravel, and MySQL
- Developed frontend interfaces with React.js, HTML5, CSS3, and Bootstrap
- Implemented AJAX-based dynamic features and REST API integrations on live client projects

Web Application Developer Intern — Dec 2022 - Mar 2023

- Developed web applications using modern web technologies and frameworks
- Designed, coded, tested, and deployed client-facing web projects

Desktop Application Developer Intern — May 2021 - Aug 2021

- Built software from concept to deployment using C and core data structures, following SDLC best practices in a small engineering team

Web Development Intern — Dec 2019 - Jan 2020

- Worked with designers and developers on client web projects from design to deployment using HTML, CSS, and JavaScript

PROJECTS

National Sport ID Platform | nationalsportsid.com | Remote

- Built a microservices platform serving 5,000+ users and 50+ clubs for national-level sports ID verification and management
- Integrated OCR-based document verification, reducing manual verification effort by 40% and achieving 99.9% validation accuracy

- Designed role-based access control (RBAC) for admin, club, and player roles, running on AWS Lambda for scalable, event-driven processing

Stack: PHP Symfony, Python, AWS Lambda, OCR, RBAC

Foundation Environmental | foundationenv.com | Apr 2024 - Present | Remote

- Redesigned the Azure backend architecture, supporting 40% more concurrent users and 30% higher API throughput
- Implemented Azure monitoring and alerting, cutting incident response time by 40% and improving platform reliability
- Collaborated remotely and asynchronously with a US-based client on content structure, information architecture, and UX improvements

Stack: ASP.NET Core, C#, SQL Server, Azure, REST APIs, HTML, CSS, JavaScript

Lead Generation Data Scraper | Jan 2024 - Present | Remote

- Built an automated lead-generation tool scraping business directories, delivering contact and company data via REST API at 95% accuracy
- Delivered 500,000+ directory listings for a real estate client through scalable, repeatable scraping pipelines

Stack: Python, Selenium, BeautifulSoup, REST APIs, Pandas

E-commerce Product Scraping Bot | Remote

- Built a multi-platform price and stock scraping solution, cutting manual data collection time by 90%
- Scraped 100,000+ e-commerce product records and built real-time price-monitoring tools tracking 50,000+ SKUs

Stack: Python, Scrapy, Selenium, REST APIs

RK Bids | rkbids.com | Remote

- Delivered UI enhancements, bug fixes, and backend performance improvements for a real-time bidding and auction platform handling concurrent live listings
- Worked asynchronously with the client to prioritize feature updates, triage bugs, and plan long-term system maintenance

Stack: ASP.NET, PHP, MySQL, JavaScript, Bootstrap, jQuery, HTML, CSS

Track & Claim Platform | trackandclaim.com | Remote

- Built and enhanced a centralized claims-tracking dashboard used by internal administrators to manage day-to-day operations
- Optimized REST API calls and query patterns, improving dashboard load performance and navigation responsiveness

Stack: ASP.NET, SQL Server, REST APIs, HTML, CSS, JavaScript

TrendCatch Business Website | trendcatch.biz | Remote

- Maintained a WordPress business website with ongoing UI updates, bug fixes, and cross-device performance improvements
- Delivered regular content updates and optimization passes while keeping the design consistent as business needs evolved

Stack: WordPress, PHP, HTML, CSS, JavaScript

CORE COMPETENCIES

Full-Stack Development | Microservices | Serverless (AWS Lambda) | Role-Based Access Control | Remote Team Collaboration | Custom Software Development | SaaS Development | CRM Development | ERP Development | REST API Development | Python Automation | Web Scraping | Cloud Deployment | Performance Optimization | Database Design | Agile Development | Asynchronous Communication

SKILLS

Languages: C#, PHP, Python, Java, JavaScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Vue.js, Bootstrap, Tailwind CSS, jQuery, AJAX

Backend: ASP.NET Core, Laravel, Symfony, Node.js, WordPress, REST APIs

Databases: SQL Server, MySQL, MongoDB, PostgreSQL, Oracle

Automation & Web Scraping: Selenium, Scrapy, BeautifulSoup, Requests, Pandas

Cloud & DevOps: Azure, Azure DevOps, AWS (Lambda), Git, Docker, CI/CD, Jenkins, Postman, Visual Studio, NUnit

Remote Collaboration: Slack, Zoom, Jira, Trello, Notion, Git-based async workflows, distributed Agile teams

EDUCATION

B.Tech in Computer Science | Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal | CGPA: 8.86/10 **2019 - 2023**

Higher Secondary (12th), Science | R. Jha College, Sitamarhi, Bihar | Score: 7.6 **2017 - 2019**
